

Dr. Gordon Edwards is the president and co-founder of the nonprofit organization Canadian Coalition for Nuclear Responsibility.

He has published articles and reports on radiation standards, radioactive wastes, uranium mining, nuclear proliferation, the economics of nuclear power, its health implications, and non-nuclear energy strategies. Edwards co-authored a 1976 nation-wide study of the role of the mathematical sciences in business, industry, government, education and science in seven volumes. *Mathematical Sciences in Canada* was commissioned and published by the Science Council of Canada.

Edwards has provided consulting services on nuclear issues to governmental and non-governmental bodies at the provincial, territorial, national and international levels. He has also provided invited testimony and expert sworn testimony to legislative bodies, commissions, and courts. He has worked as a consultant for governmental bodies such as the Auditor General of Canada, the Select Committee on Ontario Hydro Affairs, and the Ontario Royal Commission on Electric Power Planning. In 2006, he received the Nuclear-Free Future Award in the "education" category.
