

# Forums for a Nuclear-Free New York

*First in the Series:*

**“Symposium for Safe and Affordable Energy”**  
**Thursday, Jan. 15th at 2:00 PM**

## Our Speakers

**Alec Baldwin** – Prominent actor and activist, will moderate the presentations, summarize key findings, and announce upcoming forums in this series. Alec has actively opposed nuclear power since the 1990's due to safety, environmental, and cost concerns.

**Mark Z. Jacobson** – Stanford University Professor of Civil and Environmental Engineering, will explain how we can meet our energy demand with clean, renewable sources, and why nuclear is not the answer to New York's energy needs.

**Joe Mangano** – Executive Director of the Radiation and Public Health Project, will present evidence of health impacts of nuclear energy, including elevated rates of cancer and other diseases near U.S. nuclear plants.
