

# LAWN PESTICIDE ALERT

## Does your child know what this sign means?

Warm weather is here, and our kids are outdoors playing on lawns. While this is a healthy activity for children, parents need to be aware that many lawns are treated with potentially harmful chemical pesticides. **Please make your children aware of the meaning of the yellow pesticide application warning flags** and tell them to stay off lawns where they are displayed.

The unique behavior of children as well as their developing physiology make them more vulnerable to these chemicals than adults, and studies have shown that even small exposures to pesticides at critical periods of development may cause acute or long term health problems, including asthma, neurological and endocrine problems and certain cancers.

Many commonly used lawn pesticides can remain on the grass long after the warning signs have been removed. Pesticides can be inhaled, absorbed through the skin, or inadvertently ingested when children put unwashed hands in their mouths. They can also be tracked indoors on shoes, where they do not break down quickly, and can remain an exposure risk for months.

*“As a pediatrician I urge all parents to reduce pesticide use as much as possible, especially lawn services. Children’s health is more important than a few weeds.”*

**Philip J. Landrigan, M.D.**

*“Kids and toxic chemicals just don’t mix. Parents should be aware of the potential dangers of pesticides and consider using safe alternatives, especially for lawns where children play.”*

**George Latimer**  
Westchester County Executive

To limit your family’s exposure, stop using lawn pesticides and keep children away from treated areas in parks, playgrounds or on neighbor’s lawns. Even commonly used consumer “weed and feed” products contain harmful pesticides. If a neighbor is spraying their yard, close your windows and bring moveable items inside, especially children’s toys and animal food dishes.

Today, homeowners have many more safe lawn care solutions available to them as natural lawn care is the fastest growing segment of the green industry.
