

Making NYC's Parks Safe for Everyone

The EFPA Coalition is on it!

The Eco-Friendly Parks for All Coalition is dedicated to ensuring a smooth transition for NYC's new law which prohibits the use of toxic chemical pesticides in public parks. We want all New Yorkers, especially families with children and pets, regardless of zip code, to relax and enjoy their time in the city's natural green spaces without worry.

Working with the best natural landscape experts in the country, we're organizing demonstration sites at city parks and free hands-on training opportunities to help those involved in maintaining NYC Parks learn the fundamentals and cultural practices of non-toxic landscape management.

We are actively seeking the support of local community boards, elected officials and other organizations to ensure that the law is fully and successfully implemented. Contact us at gee@grassrootsinfo.org.
